TURF-TYPE TALL FESCUE

Finelawn 5GL turf-type tall fescue yields a beautiful semi-dwarf rich green turf that performs well in hot, dry regions and in locations that receive minimal maintenance.

The fescue variety combines exceptional drought resistance and superior resistance to frost and winter freezes. In addition, it exhibits superior resistance to leaf spot and brown patch. It will also perform well in shade.

LIQUID FUNGICIDE FORMULATIONS

Liquid formulations of Vorlan Flo and Fungo Flo systemic turf fungicides control key ornamental and turf diseases and are safe and convenient to use. The liquid formulations eliminate the risk of dust inhalation traditionally associated with powder pesticides.

Vorlan Flo provides up to 28 days of control of dollar spot, including its resistant strains, leaf spots, red thread, and pink snow mold. The product is available in four one-gallon jugs per case.

Fungo Flo provides protection against most major turf diseases, including brown patch and fusarium blight (summer patch and necrotic ring spot). Systemic action provides effective disease control for up to 14 days. The product is available in two 2-1/2-gallon jugs or four one-gallon jugs per case.

LAKE RESTORATION SYSTEM

Sheaffers' activated oxygen and aeration system restores lake and pond water quality. It has been used in 1/2- to 326-acre lakes with depths of three to 35 feet.

The system offers an ecologically sound alternative to repeated chemical treatments. It solves the two major causes of eutrophic waters, high suspended nutrient levels and low dissolved oxygen levels. These can lead to problems such as algae blooms, foul odors, and depleted fish populations.

TENNIS COURT UNDERGROUND WATERING SYSTEM

An underground watering system for grass tennis courts has been introduced by Har-Tru Corporation. It provides uniform and constant water to playing surfaces by retaining water under the court.

The system enables underground water to migrate to the surface by capillary action. The moisture content of the surface is monitored, and additional water is added to the system when necessary. During rainy periods, excess water will drain out of the system to prevent saturation of the court.

MOWER SAFETY CONTROLS CONVERSION

Ransomes, Inc.'s operator present controls conversion equipment can be added to all Bob-Cat mid-size mowers manufactured prior to 1989. The equipment is designed to enhance safe equipment operation practices.

Once a mower's cutting blades have been engaged, the controls automatically stop the engine and the motion of the blades, if the operator's grip on the handle is released.

GOLF ROTORS

Rain Bird's 47DS, 51DS, 95DS, and 91DS Stopmatic golf rotors provide high operating performance and uniformity while preventing low-head drainage, even on hilly terrain.

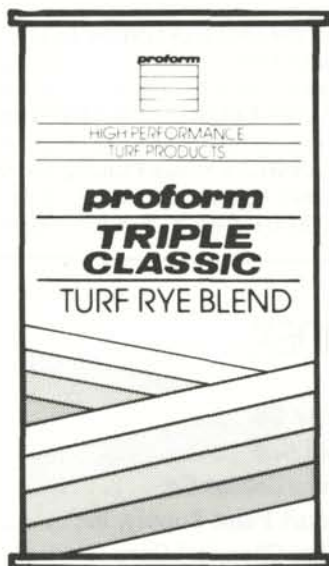

Housed in high-strength plastic cases and featuring a stabilizing flange, the rotors are built to withstand the rigors of overhead golf maintenance equipment and golf carts. They utilize Rain Bird's straight-through impact design and feature a long-lasting diaphragm valve that minimizes friction loss and can reduce both initial system cost and ongoing pumping costs.

The units have been engineered to withstand the most demanding water quality conditions. Available in both full- and part-circle models, the rotors are ideal for single- or multiple-row, battery golf course applications.

TURF RYE BLEND

Saturn, a perennial ryegrass variety which was ranked number one in the USDA's Perennial Ryegrass Test for the second consecutive year, is being blended into Proform Classic Turf Rye Blend. The mix consists of Saturn, Omega II, and Manhattan II or Competitor perennial ryegrass.

Also known as PST-2PM, Saturn is noted for its seedling vigor, winter color, and resistance to diseases such as blotch and brown patch. The fine-leaved, low-growing variety tolerates mowing to 3/8 of an inch.

AUTOMATIC ELECTRICALLY OPERATED FILTERS

Amiad's electrically operated, automatic eight- to 14-inch filters are designed for use primarily by the golf course industry. These extra-heavy-duty filters can substantially reduce maintenance by protecting valves and nozzles.

Filtration is accomplished when particles are trapped by the stainless-steel screen. Partial blockage causes a pressure differential between the filter inlet and outlet, activating the self-clean mechanism when the differential reaches four psi.

During the cleaning operation, a hydraulic valve automatically opens while revolving brushes dislodge the particles trapped on the screen. They are flushed out through the open valve for 15 seconds without disrupting the continuous water flow through the filter.

The space-saving filters can handle up to 3,000 gpm each with a maximum operating pressure of 150 psi. An unlimited number of filters can be operated in parallel to handle greater flows.

TENSIOMETERS

Hydrovisor tensiometers provide a viable option for superintendents who want hands-on irrigation control. Located in key dry areas, the sensors provide light signal indication at the superintendent's office. This feature offers valuable input for irrigation scheduling and serves as a visible warning system.

PREFABRICATED DRAIN

PDS 20 Edge Drain is designed for areas where less critical flow capabilities are needed. Its high-density polyethylene, 0.8-inch-thick core is double cusped to accept equal inflow on both sides of the drain surface.

Standard compression of the product is 42 psi. Applications include golf courses, athletic fields, foundations, and retaining walls.

We just eliminated your last excuse for buying a converted golf cart.

Introducing the Cushman® GT-1. Suggested retail price: \$3,648.00*

When you can have Cushman quality at a competitive price, there's no reason to accept second best.

The new Cushman GT-1 utility vehicle will outperform and outlast any converted golf cart on the market. Its frame and chassis are stronger and more durable. You'll find a bed

made of 14-gauge steel instead of 16-gauge steel. One-inch axles instead of 3/4-inch axles. And a proven Kohler industrial engine that's more reliable and easier to maintain.

When you need a utility vehicle that's been specifically designed for work instead of one that's been converted from play, contact your Cushman dealer for a GT-1 demonstration. Or call toll-free 1-800-228-4444 for more information today.
