BAYLETON is a powerful systemic. DYRENE is the only contact fungicide with its type of chemistry. Apply both as a program during the summer months.

Envy. You can see it in their eyes as they look at your tees, greens, and fairways. They may even start comparing. But deep down, you know they can't touch your course.

This kind of satisfaction starts with BAYLETON® 25 Turf and Ornamental Fungicide and DYRENE® 4 Turf Fungicide. Both have a long history of unparalleled performance.

Team them up for your premium fungicide program. They'll keep your course and colleagues turning green.

For more information contact your Mobay representative or Mobay Corporation, Specialty Products Group, Box 4913, Kansas City, MO 64120. (800) 842-8020.

PUMPING STATION

Designed for sports turf projects or boosting water pressure on golf courses, Watertronics' pumping station features a high-efficiency pump and motor, exterior fusible disconnect, interior pump controls, pressure gauge and switch, flow switch, and

check and drain valves.

All components are housed in a weather-resistant steel enclosure with a hinged, lockable access cover. Pump stations from five to 5,000 gpm have internal wiring and can be set in place, with electricity and water run to them.

PORTABLE NATURAL TURF SYSTEM

The Integrated Turf Management System is a portable, natural turf system. It can be used over artificial and natural surfaces, both indoors and outdoors.

The system features fully mature turf in Greenspec, a lightweight growing medium, and Greentech transport modules. The growing medium, turf, drainage system,

and containment module are packaged in one transportable unit.

THE GREENWAY GROUP

BIO-FERTILIZER

TURF-Tech II, a microbial bio-fertilizer, offers a comprehensive program for managing soil fertility. Consisting of dormant microorganisms in a wettable powder, the product can be used with any type of grass to enhance the soil/plant relationship. When applied to the soil, these legume-like microbes begin producing organic compounds which include nitrogen from nitrogen fixation, polysaccharides, organic acids, and plant growth stimulating hormones.

GREENSMOWER ROLLERS

Presenting the NEW industry standard

Here's why:

- **Roller Bearings** – separate radial and thrust bearings
- **Double Seals**
- **Stainless Steel Wear Sleeves**
- **No Wear Surfaces on Shaft**
- **Removable End Pieces**
- **No Springs** – grooved roller segments are clamped rigidly

Toughness for the most rigorous use

Fine Lawn Research proves . . . not all perennial ryegrasses are created equal.

Stallion

As a professional turf manager, you know there are measurable differences between turfgrasses. And, as research has proven, Stallion is the new breed in turf type perennial ryegrass. No longer is your choice limited to look-alike perennial ryegrasses. Stallion establishes quickly, performs well under moderate to low fertility and, with its heavy tillering ability, produces the dense turf you require. Stallion's rich color and fine leaves blend extremely well with other perennial ryegrasses, bluegrass, fine or tall fescues. So, whether you're establishing new turf, reseeding or overseeding, remember, strength of breeding always shows — Stallion — a breed apart!

TRIPLE PLAY

Since not all fairways, athletic fields, or office parks are created equal, Fine Lawn Research developed Triple Play. This is a unique blend of perennial ryegrasses that can be carefully tailored to the specific needs dictated by the use and climate conditions in your area. Triple Play includes Stallion plus two other elite turf type perennial ryegrasses. You no longer have to settle for a perennial ryegrass blend that is only satisfactory. You can have Triple Play blended to your requirements. Ask your local distributor how you can get Stallion blended specifically for you!

BATTERY RECHARGERS

Accu Power and Ultra Power II battery chargers use precise amounts of energy to bring golf car batteries to optimum levels. These UL-approved chargers have high-efficiency transformers, shorter charging time, and reduced peak demand which results in lower electricity usage.

The Accu Power system safeguards against overcharging and ensures a charge that can power a golf car for 100 holes or

more. However, recharging is recommended on a daily basis to ensure battery life.

The Ultra Power II charger features an LED range indicator that displays exactly how much a battery has been charged, even after the charger has shut off. This feature facilitates golf cart fleet rotation and battery maintenance.

Is it Sod or Seed?

CHEYENNE

A seeded turf-type, lower-growing bermudagrass with the quality and uniformity of sod...
at a fraction of the cost

"The above soccer field in the Midwest was seeded on July 1st, 1990, temperatures were in the 90s to 100s...seed germinated with noticeable top growth in 5-7 days!"

"On September 25...temperatures down into the mid 30s...local common Bermuda is completely browned out and dormant...Cheyenne Bermuda...still green."

Cheyenne is the answer to areas where bermudas are winter-killed and cool grasses exhibit disease problems.

Cheyenne is significantly more compact, more dwarf-like and more cold tolerant than common bermudas or any other seeded Bermuda available. It is uniform in texture, dark green in color and offers rapid rhizome production.
