PRODUCT UPDATE

Turf Growth Cover

Evergreen is a turf growth cover that protects grass from desiccation (winter kill) and enhances longer root growth. With Evergreen, grass turns green earlier in the spring and stays that way longer in the fall.

What makes it work so well is the unique weave of the polyolefin fabric. It allows air, moisture and sunlight to pass through while releasing excessive

heat—creating a greenhouse effect. Just two people are needed to install the Evergreen turf growth cover with its unique installation and storage system.

COVERMASTER

Biological Larvacide

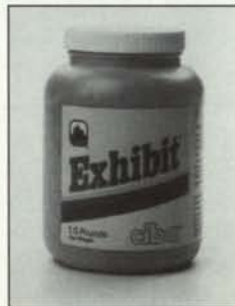

Exhibit contains beneficial nematodes that seek and destroy target insects, and provides effective control against fungus gnats, black vine weevils, strawberry-

root weevils, grubs and shore flies. It also controls cutworms, sod webworms and billbugs in turf. The product provides

four to six weeks of control and may be applied with any standard surface application, or through irrigation systems.

Because Exhibit's beneficial nematodes are naturally occurring organisms, the product is exempt from normal registration requirements by the EPA. There are also no re-entry restrictions for areas sprayed with Exhibit.

Each jar contains approximately 250 million nematodes. A case, four jars, is enough to treat one acre of turf, depending upon the target pest. One case treats approximately 14,400 square feet when treating for root weevils and grubs, or 40,000 square feet when treating for fungus gnats and shore flies. At room temperature, the product has a three-month shelf life.

Turf Covers

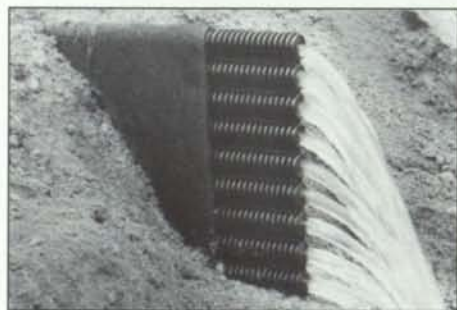

Turf Armor protects stadium turf during concerts, such as the Pink Floyd concert at Oakland's Alameda County Stadium. Light green, polyester fibers let air and sunshine in! The covers are heat welded on one side for extra strength, and available in rolls up to 20 feet wide. Turf Armor also makes batting-practice covers and reinforced football bench tarps.

Drainage System

Multi-Flow Tube Inc. of Prinsburg, MN is establishing a nationwide dealer network for their Multi-Flow Drainage Systems.

This high performance vertical drainage system combines the proven strength and flexibility of a round plastic pipe with the increased inlet area and water intercepting capability of a vertical drain. Multi-Flow Drainage systems are available in 6-, 12-, and 18-inch heights, and include a complete line of "pop on" fittings.

Typical uses include athletic fields, golf courses, highway drainage, construction drainage, retaining walls, and city maintenance projects.

Riding Mower

Walker introduces larger area mowing capability with a 62" side discharge deck. This is the largest deck offered for the mid-size Walker Tractor, fitting either the Model D, or Model T. The deck is specifically designed for mowing rough areas as well as fine turf, using belt driven blades and a reinforced deck housing. Also new for '94 Walker GHS models is a Power Dump Option for the grass catcher. Using a toggle switch, the operator dumps the catcher while sitting in the seat.

Fertilizer Spreader

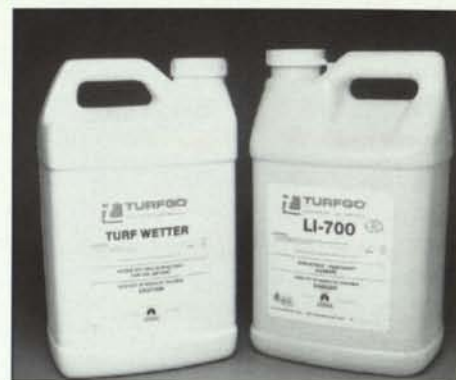

The RS-36 is a riding fertilizer spreader designed for granular or liquid application. The optional 20-gallon liquid system can be used for weed control while fertilizing. The optional 20-foot optional hand wand works great for spot spraying those hard-to-reach areas.

This four-wheel unit with its tight turning radius allows it to maneuver in all areas. The RS-36 easily fits through a 36-inch gate, is powered by a 5.5 Honda O.H.V. engine and has a five-speed transmission.

CLASSEN MANUFACTURING INC.

Wetting Surfactant

United Horticultural Supply introduces Turfgo Turf Wetter, a water-wetting surfactant that improves water movement through soil. It reduces the surface tension of water allowing penetration even through clay soils.

Water movement in soil depends on the porosity of the soil. The finer the pores in the soil, the more the water flow is restricted. Turfgo Turf Wetter enhances water flow through the small pores of finer-textured soil resulting in deeper penetration of water, which leads to better root development.

Lighting System

Qualite Sports Lighting Inc. introduces a new 1650-watt outdoor sports lighting system that produces 10 percent more usable light on the athletic field than the standard 1500-watt model.

A significant cost-saving feature of the new 1650-watt Pro-Series Lighting System is to reduce the number of fixtures, ballasts and amount of labor to create a lighting environment comparable to the 1500-watt system. When fewer fixtures are used, maintenance costs are reduced for the life of the installation.

Drainage Systems

Contech® TerraFlow-100™ prefabricated drainage systems are the economical alternative to aggregate-filled trenches and perforated pipes for subsurface drainage. The unique, pre-assembled system is well suited for sports turf and athletic field groundwave management.

TerraFlow-100's durable, flexible-formed polymer core, combined with and exterior overwrap of TerraBond™ continuous-filament polyester geotextiles, provides long-term drainage performance.

Bunker Rake

"Sand Star" is a new bunker rake that utilizes a full hydrostatic drive specially designed for high performance and low maintenance. It features high engine power, quiet operation and professional finishing results.

The rake is powered by a Kohler Command gasoline engine with 12.5hp, overhead valves and a 2.5 gallon fuel tank. The engine, along with its silent-type muffler, provides low-noise operation.

Flow Limiter

Hendrickson Bros. Fld500 breakaway flow-limiting device maintains the operation of the irrigation system even in the event of a broken riser. Easily installed at the base of any standard 1/2-inch riser, the Fld500 incorporates Hendrickson's patented flow control to reduce water loss while retaining system line pressure. It's made of high-strength ABS with an engineered break-point, and comes in five standard models to complement a variety of irrigation devices and system configurations.

It shouldn't require the whole team just to cover your field.

When weather threatens the condition of your baseball, softball, football or soccer field, you need to be able to protect it quickly with a minimum amount of effort.

Griffolyn® polyethylene is specifically designed to resist tears and abrasions while being lightweight for fast, easy installation.

- ✓ Heavy-duty, cord reinforced polyethylene resists tears and abrasions.
- ✓ Lightweight for easy installation.
- ✓ UV stabilized to weather extended exposure to direct sunlight.
- ✓ Unique combination of materials remains strong and flexible in extreme temperatures.
- ✓ Polyethylene does not rot or mildew.
- ✓ Custom sizes to fit your specific needs.

Reduce your maintenance headaches.
