

Solve All Your Drainage Problems.

- Golf Courses
- Parking Lots
- Hillside Stabilization
- Retaining Walls
- Athletic Fields
- City Streets
- Residential Landscaping
- Railroads
- Landfill Sites
- Highways

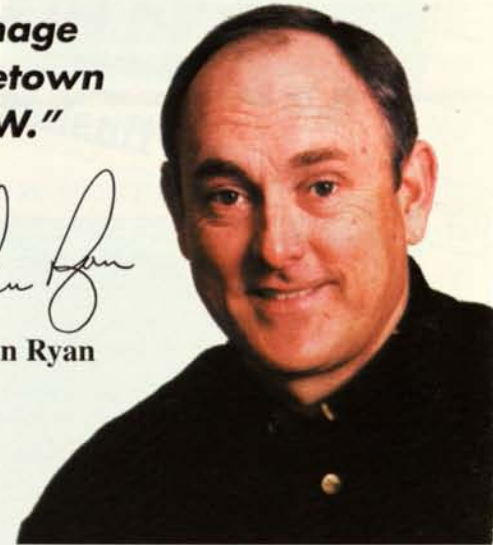

- Reduce** trench size
- Reduce** backfill
- Reduce** labor
- Reduce** costs
- Increase** drainage efficiency

"We wanted the best drainage system possible for my hometown field. We chose MULTI-FLOW."

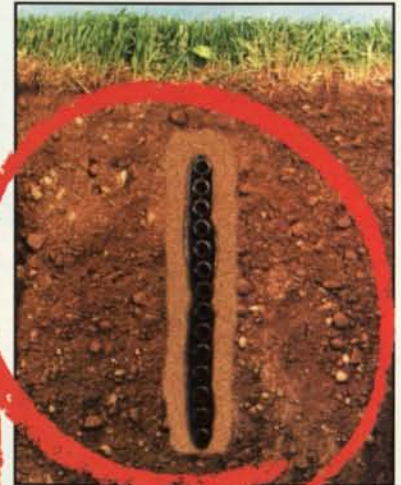

Alvin, Texas Community College

Nolan Ryan

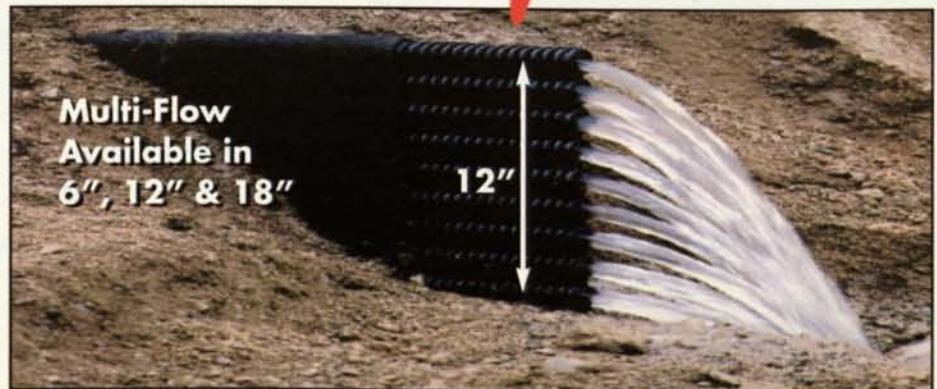

Previous attempts have been made to solve drainage problems using a "French drain" approach of buried pipe in crushed rock, and the results were often inadequate.

Narrow trench, just add sand

Today these problems are eliminated using the MULTI-FLOW Groundwater Management System.

Multi-Flow Available in 6", 12" & 18"

12"

MULTI-FLOW

proven technology for drainage problems
