

*27 years in the outfield
and we're still green.*

Fabled Fenway Park. One of the oldest and most revered baseball stadiums in the world looks as green as the day it opened despite long schedules and double-headers.

And for nearly three decades, Fenway turf managers continue to meet the pressures of delivering a beautiful turf with Lofts Kentucky bluegrasses. They've relied on the homerun-hitting combination of Preakness, 1757 and Georgetown Kentucky bluegrasses to establish a durable, moderately aggres-

sive turf and provide a deep green, lush appearance.

They stand up to heavy traffic and intense play. And reduce field hardness to help create a uniform playing surface.

So trust your athletic field to the Georgetown, Preakness and 1757 starting line-up. Because, when it comes to sports turf, the only thing green about Lofts is the color of our grass.

PREAKNESS
Kentucky Bluegrass

- ✔ Performs well at a low height of cut
- ✔ Improved drought tolerance

1757
KENTUCKY BLUEGRASS

- ✔ Displays strong disease resistance
- ✔ Good shade tolerance

Georgetown
Kentucky Bluegrass

- ✔ Performs well in transitional regions across the U.S.
- ✔ Exceptional spring and fall color
