

**When the job is measured in miles and acres you need
an office that's measured in payload and horsepower.**

Presenting the Toro Workman®1100 and 2100 utility vehicles.

They let you haul up to 1650 pounds under the power of either a twin-cylinder 16 hp or a single-cylinder 12 hp engine. And their get-the-job-done features don't end there. There's a double-walled cargo box with compartments you can customize, an optional ballfield grooming attachment and Active In-Frame™ suspension so you can float over curbs and bumps. All of which means you can sum up these machines with just two words: Can do. To learn more, call your Toro distributor at 1-800-803-8676, or visit www.toro.com.
