

Fast! Tough! Effective!

Responsive, durable, and thorough, Multi-Flow is in a league by itself. With a Multi-Flow system installed, your field will perform flawlessly and it will never be a factor in the game's outcome!

Multi-Flow's superior flow rates mean that excess water is carried away quickly. Advanced engineering means that a Multi-Flow system will not crush or block. And Multi-Flow's additional surface area puts more drainage medium in direct contact with saturated soil resulting in effective drainage.

In addition, Multi-Flow is highly adaptable, easy to use, and affordable. This season, it is certain to be a groundskeeper's MVP!
