**Supreme-Green™
Turf Growth Cover**

Supreme-Green is a multi-purpose turf growth cover made of a specially designed material to provide early green-up, accelerated germination and winter protection. The Supreme-Green cover encourages root development and rapid growth while extending your spring and fall seasons.

Supreme-Green turf growth cover is specifically engineered to promote earlier openings by 2-3 weeks.

Specifications:

- Made of tough woven non-coated polyethylene material
- UV treated for long life
- Green tint for best heat build-up
- One piece construction
- Comes complete with anchor pegs and storage bag

- Reduces seed loss
- Promotes earlier root establishment
- Accelerates Germination
- Reduces frost and ice-damage
- Porous to allow water and air circulation
- Mildew and rot resistant
- Quick turf repairs

moonbeam
Excellent dark green color and turf quality with good leaf spot and Fusarium resistance. Improved resistance to powdery mildew.

Full Moon
Very good heat tolerance with good resistance to stripe rust and stem rust. Seed production fields show very little powdery mildew, which should be a benefit to sod growers.

MOONSHINE
Shamrock x Midnight hybrid cross with good stem rust and stripe smut resistance. Excellent, economical blend component.

MIDNIGHT
Excellent low-mowing and heat tolerance and dark green winter color.

MIDNIGHT II
Dark blue-green color with medium leaf texture and good year-round color.

PROSPERITY
Very dark green color with fine leaf texture that has good wilt and heat tolerance with less water. Good resistance to stripe rust and leaf spot with improved resistance to powdery mildew.

TURFSEED, INC.

New Moons Rising after Midnight...

Introducing advanced premium Kentucky bluegrass from Turf-Seed, Inc. All are distinctly different and all are improvements over Midnight. Each has beneficial attributes to better turf!

CHAIN LINK FENCE GUARDS

Fence Guard™ protective covers for chain link fencing from Partac Peat Corp. are available in six colors—safety yellow, dark green, red, white, blue, and orange—as well as two grades—premium and standard. These UV-resistant, polyethylene covers protect players from injuries and provide a distinctive look to your fencing.

Fence Guard™ comes in cartons of ten 8-ft. sections with fifty 8-in. UV-resistant ties for securing every 2 feet to fence. With a 5-year manufacturer's limited warranty.

For safety and uniform appearance, you should remove crowns from the tops of fence posts so that the entire fence top is covered; ends can be butted or overlapped, and the product is easy to install.

Other styles also available, as well as windscreen, ball and barrier netting, wall padding and portable safety fencing.

Slugger Field, Nielsen win 2nd Field of Year title

It is not easy to grow bluegrass in the transition zone but Tom Nielsen, turf manager at Louisville's Slugger Field, seems to have it down. The Sports Turf Managers Association awarded its 2004 Professional Baseball Field of the Year Award to Nielsen, his second award in the past 3 years.

"I've been told ours is one of the few 100% bluegrass fields this far south," Nielsen says. "Since disease pressure is my most difficult challenge, so water management is the most important aspect of my managing the field."

Slugger Field's irrigation system consists of 34 Hunter I-20s, 46 I-40s, and nine I-44 heads totaling 89 heads in 13 zones, including the infield clay area. It can be controlled by a control panel or by remote control. Nielsen manually adjusts irrigation run times based on the daily use of a hand-held soil moisture sensor. In between cycles, he waters by hand. There are eight quick couplers positioned around the field so that the entire field can be watered with a 130-foot hose.

Nielsen says he used to have a problem caused by having to pull the tarp 40-50

times a year. "The majority of the time, the tarp is left on the field for long periods, which of course leads to a greater potential for disease. To solve this, we placed two 22-inch Air Max fans under two sides of the tarp. The fans can move air 150 feet, and this air creates a bubble underneath the tarp so that the water rolls off easily and enables a crew of four to pull the tarp off. Also, the air movement under the tarp lessens the chance of disease in our hot, humid climate," he says. "Without the air bubble underneath the tarp, it would normally take 12-14 people to dump the tarp." **ST**

The STMA Field of the Year Awards Program has been made possible through the generous support of its sponsors. They include Bayer; Carolina Green; Covermaster; Hunter Industries; Jacobsen, A Textron Co.; Nu-Gro; Turface Athletics/Profile Products; Turf Seed; West Coast Turf; and World Class Athletic Surfaces.

Maintenance Program

Fertilization (granular)

Magnesium-twice in the spring, twice in the fall. Sulfate of potash-twice in the spring, twice in the fall. 12-3-8 organic fertilizer-once in the spring, once in the fall.

Gro Power fertilizer 0-0-15 (every 2 weeks, June-Sept.), Gro Power fertilizer 10-2-5 (two applications, one spring, one fall), Gro Power fertilizer 5-3-1 (three applications: March, late April, and fall, all after aerification), Gro Power fertilizer 45% magnesium (twice in spring, twice in fall).

Fertilizer (liquid) superior and Floratine Turf Products program

Bi-weekly program: Floradox (oxygen stabilizer with proteins, carbohydrates, and biochemicals to strengthen response), Assure (5-16-4 +5% Ca Phosphorus), Iron Man (12-0-4 Foliar iron), K-29 (0-0-29 Potassium concentrate), Provide (micronutrients), Essence (essential secondary and micronutrients), Relief (8-0-0 +8% Ca Foliar calcium), Tiger Turf (4-4-16), Now (18-0-3).

Once a month during growing season: Calphlex (chelated calcium), Phlex-Man (liquid manganese). Spring and fall: Per-4-Max (auxiliary nutrient N-P-K), p-48 (10-45-8)

As needed: Titan (14-1-0)

Weed Control

MSMA post-emergent for grassy weeds 18-4-

10 with Dimension pre-emergent herbicide (soil temp 55 degrees); Momentum post-emergent weed control for broadleaf weeds

Fungicide

Preventative applications: March-October. Curative applications when disease is present. Fungicides used: Mancozeb, Chipco 26 GT, Touche, Banner Maxx, Manicure, PCNB, Heritage, Prodigy, Eagle, and T-Storm

Insecticide

Mach II. Apply June 1. White grub and sod webworm, apply August 30

Wetting agent

Retain-Max pellets for watering and syringing hot spots

Mowing

Height of cut 1 1/4-inch all season. Mow every day when team is home. Every other day when team is on the road.

Aerification

Hollow tines-once in the spring, once in the fall, if possible. Drag in cores and topdress 1/16-inch

Solid tines-each month during the playing season. Do not topdress.

Infield, Mound and Plate Maintenance

Till infield 6 inches deep in spring and mid-way through the season. Float to level the infield, roll with a 1-ton roller. Compact infield with a 1-ton roller every other day when games are being played. Cover with 1/4-inch of MuleMix soil conditioner. Water clay deeply to keep moist. Screen infield with John Deere bunker rake for pre-game and post-game grooming. For 5th inning drag, use four 2 x 8-inch stiff drag mats. Nail drag the infield during the season as needed. Mounds and plates are patched with Klawog clay.

Lip Maintenance

Rake and sweep out edges after each game. Blow out edges with hose after each home stand. Edge field every third day.

Winter

December: Cover infield and aprons with turf blankets, blow out irrigation, put down PCMB fungicide, maintain all equipment.

Miscellaneous

Take soil test three times a year. Tissue test twice a year. Overseed in fall-400 pounds of Midnight Bluegrass seed. Per-germinate seed during the season. My bluegrass varieties are Ram, Georgetown, 1757, and Midnight.

This Multi-Flow stuff works better.
