# John Mascaro's Photo Quiz

If you would like to submit a photograph for John Mascaro's Photo Quiz please send it to John Mascaro, 3669 NW 124th Avenue, Coral Springs, FL 33065 or email to john@turf-tec.com. If your photograph is selected, you will receive full credit. All photos submitted will become property of SportsTurf magazine.

## Answer: from page 18

This depression was caused by a fallen cement light pole as a result of Hurricane Wilma. When the hurricane hit South Florida, the Boynton Beach Little League Park was one of the many fields that fell victim to the storm. This 24-inch diameter cement light pole was not pulled from the ground but actually broken at the base, and subsequently fell on the field, crushing fencing netting and bleachers not to mention turf. The pole remained on the turf for more than 2 months until the city could find a crane company that was available to lift the poles off the field. Shortly after this photo was taken the field was rebuilt entirely with volunteer labor and funds and featured on ABC's "Extreme Makeover: Home Edition" reality show that aired last March 30 as a rebuilding effort after the Hurricane season of 2005.

Thank you to Jody Rivers, Parks Manager for the City of Boynton Beach for allowing me to take these photos.

TMA has a strong history of volunteerism and this year STMA has the highest number of volunteers involved since the association began in 1981. Some subcommittees are forming now to manage projects developed by the umbrella committee and others will be called upon later this year as needs arise.

It is STMA's goal to involve more members through committee service. To that end, STMA will be reorganizing its committee process this summer and will present its plan to the membership in the fall, with the new process in place for 2007.

#### 2006 STMA Committees

Awards To judge the association's awards program applicants selecting the Field of the Year winners, the Minor League Baseball Sports Turf Manager of the Year, and to develop strategies to enhance the programs. Steve LeGros, Chair Larry Berry, CSFM Carol Gundlach, CSFM Scott MacVicar Chuck Pula George Trivett. CSFM, Board Liaison Jim Welshans

#### **Bylaws**

To develop association bylaws that are fair and enforceable, and clearly define the expectations for membership, governance processes, and board of directors service. Ken Mrock - Chair Michael D. Boekholder Dale Getz, CSFM Carol Gundlach, CSFM Ross Kurcab, CSFM Richard Miller

## **Committee Volunteers**

Mary Owen Scott Pippen James R. Rodgers, CSFM David Rulli David Schlotthauer John Stier, Ph.D. N. Grove Teates, Jr. Jay Warnick, CSFM - Board Liaison Steve Wightman

#### Certification

To develop strategies to grow the number of certified members; to consistently monitor the program and recommend enhancements to ensure that the program is the top achievement for sports turf managers. Lance Tibbetts, CSFM -Co-chair / Board Liaison Michael Schiller, CSFM -Co-chair Eric Fasbender Trent C. Hale, Ph.D. Joe Kennedy III, CSFM Anthony J. Koski, Ph.D. Ross Kurcab, CSFM Mary Owen Rick Peruzzi, CSFM Jesse Pritchard, CSFM James R. Rodgers, CSFM Waldo Terrell

#### **Chapter Relations**

To create a chapter structure that is beneficial locally and nationally; to financially assist chapters with their administrative, operations and educational efforts; to facilitate the sharing of best practices.

Dan Douglas - Chair George Anderson Chris Brindley Richard Miller Robert Studholme Michael Tarantino T.J. Thompson Jay Warnick, CSFM - Board Liaison

#### Conference

To develop all content, sessions, workshops and off-site venues, and select speakers and moderators for the next year's conference that will make it a "must attend" event for members and nonmembers; to recommend strategies that will drive attendance to the exhibition and will add value to exhibitors. Mike Andresen, CSFM - Chair Andrea Dillinger Bob Christofferson - Conference Tours subcommittee co-chair Jeff Salmond, CSFM - Conference Student Challenge subcommittee chair Darian Daily - Conference Tours subcommittee co-chair Tra DuBois - Conference Exhibition subcommittee co-chair Dale Getz, CSFM - Conference Exhibition subcommittee co-chair Abby L. McNeal, CSFM David D. Minner, Ph.D. -Conference Education Chair Craig Potts

#### Conference Education Subcommittee

David D. Minner, Ph.D. - Chair Mike Andresen, CSFM Darian Daily Andrea Dillinger Eric Fasbender Leo Goertz Roger Havlak Bradley R. Jakubowski James A. McAfee, Ph.D. Abby McNeal, CSFM Andrew McNitt, Ph.D. Grady L. Miller, Ph.D. Floyd Perry Craig Potts Shawn Ray Connie Rudolph, CSFM Pamela Sherratt John Sorochan, Ph.D. Continued on page 43

# Invest in your future Join STMA today.

The Sports Turf Managers Association (STMA) is the recognized leader in championing the sports turf industry and its professionals. STMA members combine the science of growing turfgrasses and the art of maintaining fields to produce safe and aesthetically pleasing playing surfaces.

#### The three most important reasons for you to join STMA:

#### 1. Job security

Take advantage of STMA's programs and services, and you proactively enhance your value to your employer.

#### 2. Career success

The knowledge, skills and abilities you gain by accessing STMA's education and information can help you to prepare to take that next step in your career.

#### 3. Recognition of your professionalism

STMA's advocacy with groups such as athletic directors, parks and recreation directors, coaches, and parents enhances the image of the entire profession.

#### The top three benefits you will receive as an STMA member:

1. A network of peers who are willing to share their best practices.

- 2. Opportunities for education to help you do your job better.
- 3. Quick access to information and resources to help you save time.

#### New England STMA (NEST-

MA): At our annual spring meeting we presented the first annual NESTMA awards. Sports Turf Manager of the Year Award went to Peter Thibeault of the Noble and Greenough School and the Sports Turf Vendor of the Year Award went to Pat Hogan from Sodco. Our Summer Field Day will be August 3 in South Kingstown, RI. This year the summer field day will involve a tour. Our first stop will be in South Kingstown at one of their outstanding park facilities. After coffee/snacks we will travel by bus to Allen's Seedstore to view their seed production operation. Our next stop will be at one of New England Turf's sod farms. We will then return to South Kingstown for lunch (Gold sponsored by the Tom Irwin Company). As always we will have time for vendors to display and discuss their products. Registration notices will be mailed in June/July. For information contact David Pinsonneault at 781/861-2757 or dpinson@ ci.lexington.ma.us or Nick Caggiano at 603/589-3370 or caggianon@ci.nashua.nh.us.

Pesticides on Turfgrass

Jay Gan, Ph.D., University of California, Riverside Bruce Kidd, Dow Agro Science

Maintenance of high guality sports turf, including golf courses, rely on the adequate use of pesticides in order to protect against pests, and restore the competitive balance in favor of the turf. This session will cover two facets of pesticides on turfgrass. One will be the fate of pesticides in the environment and strategies for minimizing pesticide runoff and offsite movement. The other will cover cultural and chemical practices for managing specific weeds in turfgrass with various stressful conditions. Examples will be drawn from golf courses and professional sports fields, all the way down to your children's beat-up soccer fields, with suggestions how you can help create and maintain a safer and better performing turfgrass.

# Q&A

# **Rolling revisited**

BY DR. GRADY MILLER Professor, University of Flordia

Questions? Send them to Grady Miller at the University of Florida, PO Box 110670, Gainesville, FL 32611, or email gmiller@ mail.ifas.ufl.edu.

Or, send your question to David Minner at Iowa State University, 106 Horticulture Hall, Ames, IA 50011 or email dminner@iastate.edu. I am the head baseball coach at a Pennsylvania school. Our field has poor drainage and poor turf. I was rolling the field to make it safe for the players because it is so rough and bad bounces occur. Someone told me that at a University conference he was told to not roll the field because it will destroy roots, among other things. Could it be rolled then aerified? Is this true or is this just for perfect fields or ones that have good turf to work with? We are no longer able to roll the field and it is VERY unsafe for the kids with the bad hops we continue to get. I believe safety is first on baseball fields.

#### - Concerned coach

Thanks for your e-mail. Sounds like your field is typical of a lot of fields I see. You do not say if you thought your poor drainage was due to the soil's

characteristics or due to its hardness (or both). Also, what is causing the uneven surfaces/bad bounces? Is compaction a significant factor causing your poor turf?

If your field is being used a lot, then I would recommend aerification as often as possible to alleviate the compaction and improve its drainage characteristics. The amount of damage from rolling is dependent on a number of things: soil type, weight of roller, soil moisture when rolled, etc.

I did a quick search after starting this response and found that my colleague at Iowa State, Dr. Dave Minner, wrote in this space last year (September issue) on this very topic. He gave some information on weight and surface area of rollers. A summation statement of his article suggests that "under some circumstances rolling is a necessary and effective means of improving the playing surface of athletic fields." Perhaps the information provided in the University conference you mentioned was related to more specific situations that resulted in some turf rooting problems without considering playability issues.

To test my philosophical theory, earlier this week I asked several of my colleagues from around the country their opinions and experience with rolling. Everyone I talked to indicated they believe rolling athletic fields can be very beneficial in moderation. In fact one person reminded me that lightweight rollers are often used to replaced a mowing on golf greens to smooth the surface and increase ball roll.

Rolling once per week has been done without any significant detriment to the green. Of course rolling can physically damage grass and can certainly increase soil bulk density. A higher bulk density translates into harder fields and reduced water infiltration. It sounds like you already have these problems, but it is still not a reason to eliminate rolling from your cultural practices, especially if you feel that it is making a difference in safety of your field. But do not rely on rolling alone.

With rolling, you will likely also need to increase your aerification to address compaction. Be careful to not roll so much that you cause above ground turf damage and use as light a weight of roller as you can that still provides some smoothing benefit.

How do you decide whether to roll, then aerify or aerify and then

roll? Well, it depends on what you are trying achieve and what types of aerification and roller you have.

If your roller is very heavy and does not disperse its weight well, if you aerify and then roll you can really rut up a field. But if you roll and get the field so compact and then try to aerify you may effectively reduce your aerification depth and minimize the benefits of aerification. I have seen field managers use the aerify-then-roll sequence to get vehicle ruts out of fields. This sequence is very effective to remove the larger ruts, rolls, and dips. For more minor surface disruptions that may reduce field playability or if you have somewhat loose surface soil conditions, roll-then-aerify may be the better sequence.

If you have significant surface unevenness, you should also consider a sand topdressing and dragging program. Rolling alone should not be used to remove large lips and dips. If you are trying to remove large surface disruptions, you are probably relying on an excessively heavy roller. I would avoid using the roller on wet soils and during periods of time the turf is highly stressed. Develop an aerification program to address your hardness and infiltration issue that complements your rolling practices. Try to use topdressing and dragging for leveling the surface. Like most good things that can be bad for you in large quantities, practice rolling with moderation. And never feel bad for considering player safety when developing your maintenance practices.
