

YOUR SPORTS FIELD ISN'T GENERIC

Why Overseed That Way?

SOS at Dallas Texans Soccer Club, Farmers Branch, Texas

Overseeding made easy

EASY TRANSITION

EASY ON YOUR BUDGET

EASY PROGRAM FOR QUALITY TURF

Visit barusa.com and see what other users around the country have to say about SOS.

Overseeding isn't fun, but now it's **EASY** with Barenbrug's Super Over Seeding (SOS) program. Developed in conjunction with Dr. David Chalmers from Texas A&M University, the SOS program is based on the finest quality, newest generation turf-type annual ryegrass. Choose any of the six SOS products available (400, 310, 220, 211, 202 and 103) and control the spring transition of your turf. Select SOS 400 for rapid spring transition or select SOS 103 for a more persistent and slow transition. Select any of the other four SOS products if you need something in between. Use our online SOS selection wheel to find the right product for you.
