# READY. REPAIR.

*Rhizomatous  
Tall Fescue*

# TURF SAVER<sup>®</sup>

## ***The Only Tall Fescue with True Rhizomes***

In 2002, Barenbrug released a unique tall fescue with rhizome rich plants called RTF<sup>®</sup>, Rhizomatous Tall Fescue. Its rhizomes provide recovery to damaged turf and help promote deep roots. With reduced maintenance costs and uniform dense turf, it's no wonder Turf Saver<sup>®</sup> RTF has consistently earned high praise. After five generations of breeding, RTF promises performance not potential.

- ❑ **Produces a thick and durable lawn**
- ❑ **Quick to establish with extensive root system**
- ❑ **Saves 30% water over other cool season grasses**
- ❑ **Strong disease and insect resistance**
- ❑ **Self repairing rhizomes fill in bare spots**

 **BARENBRUG<sup>®</sup>**

Great in Grass<sup>®</sup>
